

ABDULLAH TANVEER

Flutter and MERN Stack Developer

 iamabdullahtanveer@gmail.com |  +92 326 7356166 |  [Abdullah Tanveer](#) |  [Abdullah Tanveer](#)

PROFESSIONAL SUMMARY

AI-powered Web & APP Developer and BSCS student with strong foundations in modern web technologies and software development. Experienced in building responsive applications using HTML, React, Next.js, Flutter and DART with backend knowledge in firebase, supabase, MongoDB and SQL. Proficient in C++ and data management, with a focus on creating efficient, user-friendly digital solutions. Passionate about integrating AI into web development to enhance user experience and functionality. A fast learner with strong problem-solving skills, committed to continuous growth and innovation.

TECHNICAL SKILLS

Front-End Development: Next.js, React.js (Hooks, Component Based Architecture, State Management), Tailwind CSS, HTML 5, CSS3, Bootstrap, Responsive Design

Back-End and API's: Node.js, Express.js, REST API's, Python, JWT Authentication, OAuth

App Development: Dart, Flutter

Databases: MongoDB, SQL Queries, NoSQL Queries, FireBase, SupaBase

AI Tools: Claude, ChatGPT, Anitigravity, GitHub Copilot

Development & Version Control: Git, GitHub, Vercel, Netlify

Soft Skills: Logical Thinking, Algorithmic Problem, System Design Fundamentals

EDUCATION

Matriculation (Science) | 2018-2020

Army Public School, Jalal Pur Jattan Cantt, Gujrat | Percentage: 84%

Intermediate (Intermediate in Computer Science - ICS) | 2020-2022

Punjab Group Of Colleges, Jalal Pur Jattan, Gujrat | Percentage: 78%

Bachelor's in Computer Science | 2023-2027

University Of Gujrat | Expected Graduation : 2027 | Current CGPA : 3.3

PROJECTS

StudyGenie AI | AI-Powered Study Assistant

Tech: React, MongoDB, Node.js, Tailwind CSS

- Personalized study planning based on user inputs and past progress.
- Conversational assistance (explain concepts, summarize materials, recommend exercises).
- Material intake (upload documents) and quiz generation from content.
- Progress analytics and a simple dashboard to monitor learning.

Shamas Al Kananah | E-Commerce App

Tech: Flutter, Dart, Firebase

- Custom-built mobile e-commerce application for the industrial and hardware retail sector.
- Allows customers to browse and purchase Electrical, Plumbing, Hardware, and Tools products.
- Supports both Arabic and English with a fully bilingual experience.
- Designed to deliver a reliable and efficient mobile shopping experience.

Churn Predictor AI

Tech: Python, Next.js, MongoDB

- Predicts the likelihood of customers leaving a business or service (customer churn).
- Uses customer behavior and historical data to identify at-risk customers.
- Displays churn probability through an easy-to-understand dashboard.

ADDITIONAL INFORMATION

Certificates: Web Development and JavaScript (Free Code Camp), AI for Beginners (Coursera)

Language: English, Urdu
